Washington County Fair

Complete Event Sales Management Via One Simple Card System!

The FunCard System

The FunCard System was developed in 2000. Today the FunCard System is used at events all over the country and has become the most powerful and reliable system on the market.

Internet Sales

Sell On-line and start realizing sales before your event even starts. Our customers have realized a significant increase in revenue as a result of incorporating internet sales.

Gate Admissions

It couldn't be any easier. The FunCard system automatically knows how many customers to admit and tracks your gate admissions live making this information available at the push of a button.

Touch-Screen Ticket Boxes

Our touch screen ticket box is highly configurable and is controlled from the central office. **You'll be in total control of your sales.**

Multiple Pricing Methods

The system supports multiple / configurable pricing methods. When pricing methods are changed those changes are automatically reflected on all ticket boxes within seconds.

Seller Management

Keep tight control of your sellers with the Seller Management module. Assign sellers to specific ticket boxes and manage their login through the use of PIN codes.

Specials

The FunCard System allows you to configure and sell just about any kind of special you can imagine. Create Time-sensitive Game Specials, Ride Specials, Concession Specials, Pay-One-Price Specials, or just about any combination of the above.

Management Reports

A multitude of management reports are available to you throughout your event. At anytime you'll know exactly how your show/event is doing. You'll be able to balance sellers and ticket boxes in minutes. You will be able to settle with your operators quickly and accurately. **No more counting tickets.**

Sub-second transaction processing

When it comes to processing transactions it couldn't be any easier. The customer's FunCard is scanned using the FunCard Mobile device. The system provides sub-second transaction processing which means you'll be processing customer transactions faster than ever before.

No More Paper Tickets

The FunCard system carries the tickets on a card that works much like a debit card. When a card is scanned at a game, ride, or concession stand the system automatically decrements the appropriate number of tickets from the customer's card. Now instead of manually counting tickets you push a button and get a report that automatically calculates and displays your sales by station.

**Interested in putting the
Funcard System into your event?**
