

IAFE Awards Contests 2009 Guidelines for Submitting Entries in Digital Format

The North Carolina State Fair will be making it possible for every fair attending the 2009 IAFE Convention to receive a USB flash drive containing the top three winning entries in each category. You can help make this project possible by taking just a few extra minutes to copy digital files of your entries onto a CD to accompany your entries and entry form.

You are already creating digital documents and using digital photographs for your entries, so all you need to do is copy or “burn” these files onto a CD and send it in with your regular contest entries. Refer to the specific contest rules to see exactly what needs to be submitted for each category. We ask that you set up your CD with separate file folders for each category. For example, if you entered every category in the Communications Awards, the CD would contain eight (8) separate folders for Category 1, 2, 3, 5, 6, 7, 11b and 14 with each labeled respectively. Some folders will contain only one item, while others may include multiple photographs in addition to a PDF or Word file.

For specific instructions about how to burn your entries onto a CD, please contact your local system administrator or Lindsey Becker or Marla Calico in the IAFE office.

Thank you for taking the time to read these guidelines...Good Luck!
